Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary

Application No.

10/815,236

Applicant(s)

CHILDRRESS ET AL.

Examiner

Saeed S. Mirzadegan

Art Unit

2144

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 31 March 2004.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-20 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-20 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 31 March 2004 is/are: a) ☐ accepted or b) ☒ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
 - ☐ Certified copies of the priority documents have been received in Application No. _____.
 - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☒ Information Disclosure Statement(s) (PTO/SB/08)
Paper No(s)/Mail Date 03/31/2004.
- 4) ☐ Interview Summary (PTO-413)
Paper No(s)/Mail Date. _____.
- 5) ☐ Notice of Informal Patent Application
- 6) ☐ Other: _____.

DETAILED ACTION

Information Disclosure Statement

1. The information disclosure statement (IDS) submitted on 03/31/2004 is in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statement is being considered by the examiner.

Drawings

2. Figures 1 & 2 and 3 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

3. Claims 9-16 are rejected under 35 U.S.C. 101 because The Claimed Invention is directed to a judicial exception to 35 U.S.C. 101 and is not directed to a practical application of such judicial exception because the invention as claimed does not produce a tangible result as set forth in MPEP 2106.

4. As written, applicant is claiming "A computer program product in a computer readable medium". In the disclosure, applicant further recites "Examples of computer readable media include recordable-type media, such as a floppy disk, a hard disk drive, a RAM, CD-ROMs, DVD-ROMs, and transmission-type media, such as digital and analog communications links, wired or wireless communications links using transmission forms, such as, for example, radio frequency and light wave transmissions (page 34, lines 15-21). In essence the applicant is claiming a non-statutory subject matter.

5. In order for software claims to be statutory, they must be claimed in combination with an appropriate medium and/or hardware to establish statutory category of invention and enable any functionality to be realized as set forth in MPEP 2106.01.

Software, *per se*:

The claims lack the necessary physical articles or objects to constitute a machine or a manufacture within the meaning of 35 USC 101. They are clearly not a series of steps or acts to be a process nor are they a combination of chemical compounds to be a composition of matter. As such, they fail to fall within a statutory category. They are, at best, functional descriptive material *per se*.

Art Unit: 2144

Descriptive material can be characterized as either "functional descriptive material" or "nonfunctional descriptive material." Both types of "descriptive material" are nonstatutory when claimed as descriptive material *per se*, 33 F.3d at 1360, 31 USPQ2d at 1759. When functional descriptive material is recorded on some computer-readable medium, it becomes structurally and functionally interrelated to the medium and will be statutory in most cases since use of technology permits the function of the descriptive material to be realized. Compare *In re Lowry*, 32 F.3d 1579, 1583-84, 32 USPQ2d 1031, 1035 (Fed. Cir. 1994)

Merely claiming nonfunctional descriptive material, i.e., abstract ideas, stored on a computer-readable medium, in a computer, or on an electromagnetic carrier signal, does not make it statutory. See *Diehr*, 450 U.S. at 185-86, 209 USPQ at 8 (noting that the claims for an algorithm in *Benson* were unpatentable as abstract ideas because "the sole practical application of the algorithm was in connection with the programming of a general purpose computer.").

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all

obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459

(1966), that are applied for establishing a background for determining obviousness

under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
 2. Ascertaining the differences between the prior art and the claims at issue.
 3. Resolving the level of ordinary skill in the pertinent art.
 4. Considering objective evidence present in the application indicating obviousness or nonobviousness.
6. Claims 1, 6-9, 14-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Applicant Own Admitted Prior Art (APA) in view of Kiremidjian et al. (Kiremidjian)

US PG Pub. No. 2003/0229714, and further in view of Chidambaran et al.
(Chidambaran) US PG. Pub. No. 2005/0055446.

7. The applied reference has a common assignee with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art only under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 103(a) might be overcome by: (1) a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not an invention "by another"; (2) a showing of a date of invention for the claimed subject matter of the application which corresponds to subject matter disclosed but not claimed in the reference, prior to the effective U.S. filing date of the reference under 37 CFR 1.131; or (3) an oath or declaration under 37 CFR 1.130 stating that the application and reference are currently owned by the same party and that the inventor named in the application is the prior inventor under 35 U.S.C. 104, together with a terminal disclaimer in accordance with 37 CFR 1.321(c). This rejection might also be overcome by showing that the reference is disqualified under 35 U.S.C. 103(c) as prior art in a rejection under 35 U.S.C. 103(a). See MPEP § 706.02(I)(1) and § 706.02(I)(2).

8. Regarding Claim 1, APA discloses a method in a data processing system, for allocating service provider system resources to hosted applications, comprising: determining whether a breach of a first SLA is imminent (IDS, AA, page 1, lines 22-25 & page 5, lines 23-24); retrieving SLA information for the SLA (IDS, AA, page 3; lines 12-

14) determining a minimum penalty SLA based on the retrieved SLA information (IDS, AA, page 1, lines 30-32 and page 2, lines 1-2). However, APA does not explicitly teach: a plurality of service level agreements (SLAs) currently being serviced by service provider system resources.

9. In the same field of endeavor, Kiremidjian teaches, (page 4, ¶0059) plurality of SLA's.

10. It would have been obvious to one of ordinary skill in the networking art at the time the applicant's invention was made to combine Kiremidjian's teachings of plurality of SLA's with the teachings of APA, for the purpose of (see Kiremidjian, page 2, ¶0017). APA provides motivation to do so, by providing the ability to manage performance and availability levels of monitored service elements (see IDS, AA, page 1, lines 2-7).

Claim Rejections - 35 USC § 103

11. Regarding Claim 1, APA-Kiremidjian, disclose the invention as substantially claimed. However, APA-Kiremidjian do not explicitly teach: reallocating service provider system resources from applications associated with the minimum penalty SLA to applications associated with the first SLA.

12. In the same field of endeavor, Chidambaran teaches, (page 3, ¶0043) reallocation of resources.

13. It would have been obvious to one of ordinary skill in the networking art at the time the applicant's invention was made to combine Chidambaran's teachings as explained above with the teachings of APA-Kiremidjian, for the purpose of (see Chidambaran, page 2, ¶0027). APA provides motivation to do so, by providing the ability to manage performance and availability levels of monitored service elements (see IDS, AA, page 1, lines 2-7).

14. Regarding Claim 6, ARA further discloses, determining whether a breach of a first SLA is imminent includes using a prediction engine to generate a prediction of whether the first SLA will be breached based on monitored metrics of a service provider system (IDS, AA, page 5, lines 23-24).

15. Regarding Claim 7, ARA further discloses, the prediction engine is a trend analysis algorithm associated with a service level management system (IDS, AD, page 4, lines 14-19).

16. Regarding Claim 8, ARA further discloses, if it is determined that a breach of a first SLA is not imminent, allocation of service provider system resources is performed in a default manner (IDS, AD, page 4, lines 9-13).

Art Unit: 2144

17. Claim 9, lists all the same elements of claim 1, but in a computer program product form rather than a method form. Therefore, the supporting rationale of the rejection to claim 1 applies equally as well to claim 9.

18. Claim 14, lists all the same elements of claim 6, but in a computer program product form rather than a method form. Therefore, the supporting rationale of the rejection to claim 6 applies equally as well to claim 14.

19. Claim 15, lists all the same elements of claim 7, but in a computer program product form rather than a method form. Therefore, the supporting rationale of the rejection to claim 7 applies equally as well to claim 15.

20. Claim 16, lists all the same elements of claim 8, but in a computer program product form rather than a method form. Therefore, the supporting rationale of the rejection to claim 8 applies equally as well to claim 16.

21. Claim 17, lists all the same elements of claim 1, but in an apparatus form rather than method form. Therefore, the supporting rationale of the rejection to claim 1 applies equally as well to claim 17.

Claim Rejections - 35 USC § 103

22. Claims 2, 10 are rejected under 35 U.S.C. 103(a) as being unpatentable over APA-Kiremidjian-Chidambaran as applied to claim 1, 9 above and further in view of Laye et al. (Laye) US PG Pub. No. 2003/0120771.

23. Regarding Claim 2, APA-Kiremidjian-Chidambaran, disclose the invention as substantially claimed. However, APA-Kiremidjian-Chidambaran do not explicitly teach: information from one or more Extensible Markup Language (XML) documents in an SLA storage system.

24. In the same field of endeavor, Laye teaches, (page 4, ¶0062) transferred information including various types of SLA events in Extensible Markup Language (XML).

25. It would have been obvious to one of ordinary skill in the networking art at the time the applicant's invention was made to combine Laye's teachings as explained above with the teachings of APA-Kiremidjian-Chidambaran, for the purpose of (see Laye, page 1, ¶0013). APA provides motivation to do so, by providing the ability to manage performance and availability levels of monitored service elements (see APA, page 1, lines 2-7).

26. Claim 10, lists all the same elements of claim 2, but in a computer program product form rather than a method form. Therefore, the supporting rationale of the rejection to claim 2 applies equally as well to claim 10.

Claim Rejections - 35 USC § 103

27. Claims 3-5, 11-13, 18-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over APA-Kiremidjian-Chidambaran as applied to claims 1, 9, 17 above and further in view of Chaddha et al. (Chaddha) US PG Pub. No. 2006/0293942.

28. Regarding Claim 3, APA-Kiremidjian-Chidambaran, disclose the invention as substantially claimed. However, APA-Kiremidjian-Chidambaran do not explicitly teach: SLA information includes one or more penalties associated with each of the SLAs.

29. In the same field of endeavor, Chaddha teaches, (page 7, ¶0068, lines 14-19 & ¶0070) information associating penalties to SLAs.

30. It would have been obvious to one of ordinary skill in the networking art at the time the applicant's invention was made to combine Chaddha's teachings as explained above with the teachings of APA-Kiremidjian-Chidambaran, for the purpose of (see Chaddha, page 1, ¶0011). APA provides motivation to do so, by providing the ability to manage performance and availability levels of monitored service elements (see APA, page 1, lines 2-7).

Art Unit: 2144

31. Regarding claims 4, 5 the limitations of these claims have already been addressed above.

32. Claim 11, lists all the same elements of claim 3, but in a computer program product form rather than a method form. Therefore, the supporting rationale of the rejection to claim 3 applies equally as well to claim 11.

33. Claim 12, lists all the same elements of claim 4, but in a computer program product form rather than a method form. Therefore, the supporting rationale of the rejection to claim 4 applies equally as well to claim 12.

34. Claim 13, lists all the same elements of claim 5, but in a computer program product form rather than a method form. Therefore, the supporting rationale of the rejection to claim 5 applies equally as well to claim 13.

35. Claim 18, lists all the same elements of claim 3, but in a computer program product form rather than a method form. Therefore, the supporting rationale of the rejection to claim 3 applies equally as well to claim 18.

36. Claim 19, lists all the same elements of claim 4, but in a computer program product form rather than a method form. Therefore, the supporting rationale of the rejection to claim 4 applies equally as well to claim 19.

37. Claim 20, lists all the same elements of claim 5, but in a computer program product form rather than a method form. Therefore, the supporting rationale of the rejection to claim 5 applies equally as well to claim 20.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Please refer to form PTO-892 (Notice of Reference Cited) for a list of relevant prior art.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Saeed S. Mirzadegan whose telephone number is 571-270-3044. The examiner can normally be reached on M-F 8:00-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, William Vaughn can be reached on 571-272-3922. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
